

Motorized Skylight Shades Commercial and Residential Applications

Commercial Space

Motorized skylight shades are the ultimate in convenience and are perfect for hard-to-reach windows in commercial settings. Today's technology allows you to open and close your shades with the push of a button or with a tap of your phone or smart device. These remote controlled shades offer flexibility in filtering sunlight—whether using translucent, opaque or blackout fabrics.

Residential Space

Motorized skylight shades add elegance and convenience in residential settings. Motorized window shades are used to control natural light easily, naturally cool interior space, and protect it from the harsh sunlight with the click of a button.

Convenience: Homeowners can easily dim all the blinds in one room at once with a remote device.

Comfort: Prevent the harsh glare of natural sunlight from disrupting daily activities.

Privacy: Blackout shades for skylights control and block out sunlight in bedroom or theatre room settings.

Beautiful Design: Motorized shades come in variety of colors and fabrics to create a beautiful design to go with custom home interiors.

Sunlight Protection: Increase energy efficiency in residential settings by controlling the amount of sunlight that enters, as well as protecting home furnishings from sun damage.
